**Marietta's Institute for Learning in Retirement**

The Institute for Learning in Retirement is a community-based organization of retirement age people who share a love of learning. At its heart is an academic program designed by its members to suit their interests and taught by knowledgeable instructors.

Several courses of cultural interest will be offered on designated days in September, October, and November for folks in the Mid-Ohio Valley.

The cost is \$30 per course. You may take as many courses as you wish. Classes will take place at various locations.

To register for courses, send the completed Registration Form for the fall courses with payment to:

**MORE STORIES IN STONE**

We will meet at the Levee House Café and car pool to a local cemetery where we will view the resting places of some of Marietta's past prominent and colorful citizens. Naturally, their lives will be discussed and audience participation is encouraged. We will then return to the Levee House for lunch and continued discussion. (Lunch is optional) "Rainy day" topics include the Children's Home cemetery and symbolism in gravestone design. Local historian Louise Zimmer will conduct a tour of Mound Cemetery as part of the course.

**BEGINNING CALLIGRAPHY**

Learn the fundamentals of calligraphy by studying the Foundational Letterstyle. The Foundational Letterstyle will give you the basic understanding of the formation of the letters, and the broad edged pen and ink. With knowledge of this hand, you can then easily learn all of the myriad different letterstyles and how to develop your own styles and variations. Life is a fascinating odyssey of epic proportions. Add a little beauty to your trip. Materials required: Students will bring ruler, #2 pencil, eraser, bond paper. Pens and ink will be provided at approximate cost of \$10.

**GLOBAL CLIMATE CHANGE**

So...Is it time to sell the beach house? How do we predict the global climate fifty years from now when it's hard to predict the local weather next week? What is the science behind the climate models experts are using for prediction? These are some of the questions we will consider. We will examine bits of physics, chemistry, geology and economics as we build some simple models (and look at sophisticated models on-line) to predict the temperature of our planet. We will generally avoid mathematics, but we will use some high school algebra in the course.

Instructor .... Dave Cress. Degrees in Physics,  
 ..... Environmental Science and Metallurgy

 Cost ..... \$30.00  
 Limit ..... 25 Participants

**JAPANESE CULTURE AND LONGEVITY**

Japanese women's average life expectancy leads the highest in the world for the last 23 consecutive years! We will discuss the challenges that the country with the most rapidly aging population faces by examining the lifestyle, social structure and awareness to health and environment. A touch of style, social structure and awareness of health and environment. A touch of cultural experience to learn simple Japanese and letters, how to use chopsticks, taste sushi and try flower arrangement from your garden. This class requires open discussion and active participation. Join in fun!
