

This poster will offer a deeper understanding of the Belbin Team Roles methodology created by R. Meredith Belbin (1981). Associated with team role theory, the Belbin Team Roles are comprised of nine distinct team roles. There are three task roles, three people roles, and three action roles. COMM 411 utilized the Belbin Team Role methodology this semester to develop a better understanding of each student's behavioral tendencies within a team. In turn, this helped strengthen their bonds while working on team projects.
